

# Office Memorandum

United States Government

TO: FADM William D. Leahy

Date: February 14, 1947

FROM: RADM Richard E. Byrd

SUBJECT: OPHJP

TOP SECRET

**TOP SECRET**

Pursuant to your directive regarding reference OPHJP and goals of said mission, I am reporting the following discoveries to your office directly and exclusively:

With assistance from NAMOR, the TORCH and TORO, we have discovered the exact extent of Nazi saucer activity in Antarctica. It has become apparent to those of us involved in this operation that the Nazis had indeed discovered and attempted to exploit extra-terrestrial technologies in the creation of their saucer fleet.

NAMOR had reported to us a long-standing myth of the ATLANTEANS of a tropical jungle paradise hidden in a volcanic valley in Antarctica. Upon arriving at the South Pole, we set up base and the TORCH and TORO began carving out an acceptable path of exploration. During this process, sheet metal of an unknown origin was discovered buried deeply below the ice containing indecipherable alien glyphs. NAMOR extracted the sheets and brought them to an ATLANTEAN academy for possible translation.

After several days of waiting, NAMOR returned with complete translations of the sheets. The complete translations are attached and a summary follows:

An extra-terrestrial race known as NUWALI was commissioned by a second race of extra-terrestrials called BEYONDERS to set up a number of game preserves on several planets in order for the BEYONDERS to observe the evolutionary process. Advanced technological devices were installed in a volcanic valley near the South Pole which created a tropical jungle environment cut off from the rest of the world. This reportedly took place during Earth's Triassic Era. The NUWALI state that they imported all manner of Earth life to this preserve, as well as bringing Earth's original hominid races to the planet from other-worldly sources.

The sheets go on to state that the NUWALI were eventually decommissioned from the project. However, the technology was left in place and this preserve is still intact. After several more days of travel with NAMOR at the lead we found the tropical preserve. Much to our amazement, dinosaurs were freely roaming the jungle!

TORCH and TORO, along with NAMOR, ventured into the preserve and reported their findings and photographs to the group, which are also attached with this report. TORCH also brought back pieces of the alien technology for return to the United States. Upon leaving the preserve and continuing our search for the NAZI saucer base, our fleet was attacked by several Pterodactyls, which we were able to defeat and contain the corpses, also for return to the U.S.

It took two more days to finally discover the NAZI saucer base. To our utter surprise, the base was active and manned with soldiers unaware of the defeat of their homeland. I dare not speculate on the fate of our mission if NAMOR, TORCH and TORO had not been with us. After defeating what was left of the NAZI saucer fleet, we discovered some horrible secrets.

Recent discoveries in Germany following the cessation of hostilities in the European theatre seem to indicate that the NAZIS had found this preserve several years earlier and were incorporating the genetic studies conducted by the NUWALI eons ago with current NAZI genetic engineering and testing.

Several saucers and NAZI scientists have been secured and were also brought back to the U.S. at the end of our mission.

My crew, myself, NAMOR, TORCH and TORO are available for debriefing at your discretion.
